

Module sui::hash

Module which defines hash functions. Note that Sha-256 and Sha3-256 is available in the std::hash module in the standard library.

@param data: Arbitrary binary data to hash Hash the input bytes using Blake2b-256 and returns 32 bytes.

@param data: Arbitrary binary data to hash Hash the input bytes using keccak256 and returns 32 bytes.

Function

@param data: Arbitrary binary data to hash Hash the input bytes using Blake2b-256 and returns 32 bytes.

```
```bash
```

```
```
```

```
```bash
```

```
```
```

@param data: Arbitrary binary data to hash Hash the input bytes using keccak256 and returns 32 bytes.

```
```bash
```

```
```
```

```
```bash
```

```
```
```

Function

@param data: Arbitrary binary data to hash Hash the input bytes using keccak256 and returns 32 bytes.

```
```bash
```

```
```
```

```
```bash
```

```
```
```
