

Module `sui_system::storage_fund`

Struct representing the storage fund, containing two Balances:

Called by [sui_system](#) at genesis time.

Called by [sui_system](#) at epoch change times to process the inflows and outflows of storage fund.

Struct

Struct representing the storage fund, containing two Balances:

```
```bash
```

```
```
```

Called by [sui_system](#) at genesis time.

```
bash (package)
```

```
bash (package)
```

Called by [sui_system](#) at epoch change times to process the inflows and outflows of storage fund.

```
bash (package)
```

```
bash (package)
```

```
```bash
```

```
```
```

```
```bash
```

```
```
```

```
```bash
```

```
```
```

```
```bash
```

```
```
```

Function

Called by [sui_system](#) at genesis time.

```
bash (package)
```

```
bash (package)
```

Called by [sui_system](#) at epoch change times to process the inflows and outflows of storage fund.

```
bash (package)
```

```
bash (package)
```

```
```bash
