

# StakeSubsidy

Parameters that control the distribution of the stake subsidy.

SUI set aside for stake subsidies -- reduces over time as stake subsidies are paid out over time.

Number of times stake subsidies have been distributed subsidies are distributed with other staking rewards, at the end of the epoch.

Amount of stake subsidy deducted from the balance per distribution -- decays over time.

Maximum number of stake subsidy distributions that occur with the same distribution amount (before the amount is reduced).

Percentage of the current distribution amount to deduct at the end of the current subsidy period, expressed in basis points.
