Module sui::nitro_attestation

Represents a PCR entry with an index and value.

Nitro Attestation Document defined for AWS.

Error that the feature is not available on this network.

Error that the attestation input failed to be parsed.

Error that the attestation failed to be verified.

Error that the PCRs are invalid.

@param attestation: attesttaion documents bytes data. @param clock: the clock object.

Returns the parsed NitroAttestationDocument after verifying the attestation, may abort with errors described above.

Returns a list of mapping PCREntry containg the index and the PCR bytes. Currently AWS supports PCR0, PCR1, PCR2, PCR3, PCR4, PCR8.

Internal native function

Struct

Represents a PCR entry with an index and value.

```bash

```

Nitro Attestation Document defined for AWS.

```bash

```

Error that the feature is not available on this network.

```bash

```

Error that the attestation input failed to be parsed.

```bash

```

Error that the attestation failed to be verified.

```bash

```

Error that the PCRs are invalid.

```bash

```

@param attestation: attesttaion documents bytes data. @param clock: the clock object.

Returns the parsed NitroAttestationDocument after verifying the attestation, may abort with errors described above.

```bash
```

```bash
```

```bash
```

```bash
```

```bash
```

```bash
```

```bash
```

```bash
```

Returns a list of mapping PCREntry containg the index and the PCR bytes. Currently AWS supports PCR0, PCR1, PCR2, PCR3, PCR4, PCR8.

```bash
```

```bash
```

```bash
```

```bash
```
